Webcam and microphone

Test the microphone and webcam on your device before the lesson. During the lesson, we recommend turning on the camera for better communication with the teacher.

Software

Classes run on one of two platforms: Zoom or Webex. To quickly connect to the lesson, we recommend downloading both (you do not need to create any accounts on these platforms).

ZOOM
https://zoom.us/download
WEBEX
https://www.webex.com/downloads.html/

Study materials

Familiarize yourself with lessons materials before the upcoming lesson in your personal account. That will help you to enjoy a more effective lesson.

Quiet place

Sit in a **quiet place** for a lesson. Noise should not distract you or other participants in the lesson. If noise is difficult to get rid of, turn off your microphone.

Student name

When entering class, write in the suggested field your **real name**, rather than random words, to make it easier for the teacher to communicate with you.

Greeting

Greet the teacher, drawing attention to yourself, saying "Hello!" This way the teacher will know that you are in class.

The Right Attitude:

- **English Only**

  Be prepared to use **only English at the lesson.** Some students from other countries may not know your native language.

- **Positive thinking**

  Think positive. The fact that you have prepared, entered the class and participated

in the lesson is already a success. Even if something was difficult to understand, that should not scare you off. The material and instructions will be repeated from lesson to lesson and you will learn them soon.

- ## New experience

    If the lesson did not meet your expectations (inappropriate language level, you didn't like the teacher's personality), try another group. It will be a **new experience** and you will better understand your needs.
